Erin,
Attached are the State's comments on the Toxins appendix as an FYI. I am interested on EPA's take on p. 26 which references SWRCB Decision 1379 and 1628 pertaining to use of water to dilute pollutants. Does it pertain to just point source pollution? This seems to conflict with recent national efforts related to instream flow requirements to maintain water quality.

Any insight would be greatly appreciated. I am still learning to navigate the bizzare world of California water regulations.

Thanks,
Leanna

Friends --

a copy of the State comments for your files. Worth a quick glance -- some interesting things. I especially like how they've recommended re-coloring some table entries and list citations for why that should be so.

Steve
